EDUCATION

2024-juin 2026

ABDELHAMID MEHRI 2 UNIVERSITY

- MASTER DEGREE IN DATA SCIENCE INTELLIGENCE SYSTEMS .

2021-juin 2024

ABDELHAMID MEHRI 2 UNIVERSITY

- BACHELOR DEGREE IN COMPUTER SCIENCE

SKILLS

- Project Management
- Public Relations
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

LANGUAGES

- Arabic (C2)
- English (B2)
- French (B1)
- German (B1)

PROFILE

Ambitious Master's student in Artificial Intelligence and Data Science, with experience in projects combining data analysis, web development, and problem-solving. Known for adaptability, teamwork, and analytical thinking, with strong motivation to learn, grow, and contribute to impactful and innovative solutions.

WORK EXPERIENCE

● ROBOTICS COACH

2021- APRIL 2026

jil technology - scientific excellence club

- Delivered STEM training in coding, robotics, and electronics
- Guided students in competitions (FIRST LEGO League, Robofest, etc.)
- Designed interactive workshops using modern tools and hands-on learning
- Created educational content using Canva and CapCut
- Encouraged problem solving, teamwork, and innovation

TECHNICAL SKILLS

- Proficient in using ChatGPT, Claude, and Gemini for code generation, debugging, and technical explanations
- Experience with GitHub Copilot for assisted development
- Basic knowledge of prompt engineering to interact effectively with AI systems
- Familiar with workflow automation using n8n
- Web Development: HTML, CSS, JavaScript, React.js, Spring Boot
- Databases: MySQL, MongoDB, SQL (advanced)
- Programming & OOP: Java (OOP), Python
- Data Science & Machine Learning: NumPy, Pandas, Matplotlib, EDA, Data Cleaning, Machine Learning Algorithms, Deep Learning Models
- Big Data & Cloud: Hadoop (HDFS, MapReduce), Spark, HBase, Docker
- Networking & Systems: RIP Routing, ACL Configuration (Cisco Packet Tracer), Linux basics
- Data Visualization & BI: Excel (advanced), Power BI
- Other Tools: Git/GitHub also AWS Services .

PROJECTS

- **Built an automation workflow using n8n to connect multiple services (form submission → database → email notification). Reduced manual tasks and improved workflow efficiency through API integrations.**
- **Developed a personal AI chatbot integrating multiple AI models including Gemini and ChatGPT APIs. Designed to generate intelligent responses, assist in tasks, and handle dynamic user interactions.**
- **School Management Web App :** Developed a React.js front-end integrated with Spring Boot back-end for school affectation management.
- **Amazon Reviews Sentiment Analysis :** Performed data preprocessing and EDA, applied machine learning model (TF-IDF + Logistic Regression) for sentiment prediction.
- **Networking Project :** Configured RIP v2 dynamic routing and extended ACLs in Cisco Packet Tracer, including secure communication rules.
- **E-Commerce Store Analytics (Power BI) :** Designed an interactive dashboard for sales, customers, and product performance analysis.
- **Pharmacy Intelligence System (Bachelor Thesis):** Built a CRUD-based pharmacy management system with user authentication and ordonnance scanning features.
